

## Vibrio Webinar Series:

A series of workshops aimed at industry and regulators to practically address the risk associated with vibrio species in Australian bivalve shellfish

### Webinar 1:

Wed 21/04

12:30 - 2pm (AEST)

Presentation from Consultant

- Introduction from SafeFish – the size of the issue in Australia, which states are affected?
- Status of science (including pathogenic vibrio species)
- What is the best way to assess risk in growing areas?
- Introduction to practices used to mitigate *vibrio parahaemolyticus* risk

### Webinar 2:

Thurs 22/04

12:30 - 2pm (AEST)

Workshop led by Consultant

- Practices used to mitigate *Vibrio parahaemolyticus* risk extended
- Build on knowledge from implementation by the Tasmanian industry

### Webinar 3:

Wed 28/04

10 - 11:30am (AEST)

Workshop led by Consultant

- Different international models of control
- Case study—International Expert to discuss the practicalities of living with *Vibrio parahaemolyticus* risk management
- Is guidance necessary in Australia?
- If so, what should be included, where should it sit, who should develop it?

### Featuring International Vibrio Experts:

- **Dorothy-Jean McCoubrey** (NZ consultant) Webinar lead
- **Enrico Buenaventura** (Senior Scientific Advisor for Health Canada)
  - Canadian bivalve industry (TBC)
